The risk of being overweight and obese

Obesity has been linked to numerous major illnesses such as coronary heart disease, high blood pressure, diabetes, cancer and arthritis. At the same time, overweight individuals are often troubled psychologically and develop an inferiority complex as a result. The agony of being overweight is something only the obese can fully understand.

Obesity is typically attributed to two contributing factors; low activity level and excessive calorie intake. Therefore, traditional weight loss methods focus on increasing activity level and reducing calorie intake. A successful intervention to control obesity will not only lower one's probability of weight related diseases but also help to regain one's confidence through a shapelier body.

AVALON™ Fat Burner, lose weight healthily and with ease

AVALON™ Fat Burner is a revolutionary slimming formula which contains a combination of natural green tea extract, probiotics complex and water soluble dietary fibre. It is free from harmful substances and can help you lose weight with ease.

24hours
slimming
on the go!

World's Health Organisation guidelines to slimming supplements states that the product must not induce diarrhea, suppress appetite or cause fatigue. AVALON™ Fat Burner reduces fat, not water, and thus does not cause diarrhea, loss of body fluid, insomnia, heart palpitation and most importantly, weight bounce. This adheres to WHO guidelines perfectly.

Research has shown that the amount of active ingredients in each capsule of AVALON™ Fat Burner can effectively burn calories and fats, allowing 24 hours non-stop slimming action.

NO.1 Concern of obesity:

Excess Fats limits your fashion options—Weight gain usually starts from the tummy area resulting in “swimming buoy” to hang at the waist. AVALON™ Fat Burner increases metabolism, inhibit carbohydrates from converting into fats and delay breakdown of starch. Reduce the bulging tummy day by day and look great even with the simplest clothes.

NO.2 Concern of obesity:

Bad breath, dull skin tone and constipation—Obese people tend to get toxins built up in the body and this may result in bad breathe, dull complexion or even skin pigmentation. AVALON™ Fat Burner helps to eliminate toxins and ease bowel movement thus letting you achieve an enchanting, shapely body as well as fresher breath and brighter skin.

NO.3 Concern of obesity:

Saggy and wrinkled skin after slimming—Some slimming products induce loss of body fluid causing skin cells to lose its energy resulting in rapid aging. AVALON™ Fat Burner burns only fatty deposits and does not cause loss of body fluids, thus after weight loss is achieved, the skin remains smooth and toned.

NO.4 Concern of obesity:

Weight bounce—Some people experience weight bounce after stopping the course of the particular supplement due to the diuretics placed in the product. As a result, rapid weight gain occurs coupled with electrolyte imbalance. AVALON™ Fat Burner does not contain diuretics and thus eliminating the possibility of weight bounce.

NO.5 Concern of obesity:

Fear of contracting Anorexia after slimming, affecting health condition—Some people consume products containing appetite suppressant and develop anorexia upon stopping the course of supplements, causing major health concerns, AVALON™ Fat Burner does not contain any appetite suppressant which makes it a safe product to consume.

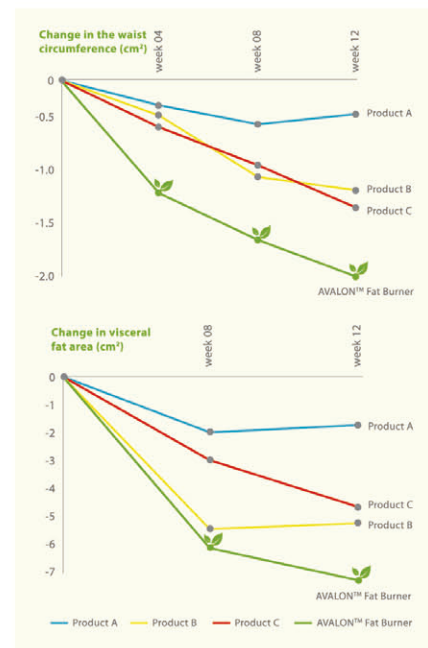

NO.6 Concern of obesity:

Gastrointestinal malfunction after slimming—Some people develop gastrointestinal malfunction while consuming products containing laxative. Such product causes diarrhea, loss of nutrients and body fluid; resulting in pale and dull looking skin. AVALON™ Fat Burner is free from laxative, thus it is safe for long term consumption.

NO.7 Concern of obesity:

Slimming products causes Insomnia, and heart palpitation—Some people suffer from insomnia and heart palpitations and to further extent, neuron functionality issues when they consume products containing ephedrine. The Active ingredients in AVALON™ Fat Burner are safe and beneficial to health, even enhancing sleep quality and improving cardiac health.

Efficacy of AVALON™ Fat Burner as compared to other products containing Green Tea Extract

Who should use AVALON™ Fat Burner and how long before results show?

- For people with low calorie intake but gain weight due to lack of physical activities, results will be seen within 2–4 weeks.
- For people that are in a bad nutritional state, poor dietary habits and unhealthy lifestyle, or fatty visceral problems which were caused by obesity will need 7–12 weeks to see initial results.
- For people who seek weight maintenance and wish to retain their youthful selves.

As AVALON™ Fat Burner contains all natural and healthy ingredients, it is safe for long term consumption.

AVALON™ Fat Burner Direction of use

Take 1 capsule in the morning before breakfast with a full glass of water and 2 capsules in the evening before dinner with a full glass of water preferably 0–15 min before meal. For best results, avoid eating fat rich food for dinner.
