6 BILLION PROBIOTIC CELL
ADVANCE FORMULA
+Aloe+FOS+Dietary Fibre

No. 1 Detox Brand in Singapore

What is Probiotics?

Probiotics are a class of beneficial bacteria that promote health, balance and efficient functioning of the digestive system.

Probiotics inhabiting in the intestines aid food digestion by breaking them down into fats, amino acids, carbohydrates, vitamins and minerals etc for absorption.

Another function of probiotics is to prevent or limit the growth of pathogens that prohibits proper nutrient absorption, create intestinal disturbances and eventually cause more serious illness.

Prevention of illness by a well-maintained microflora balance is accomplished by "competitive exclusion" –the good bacteria takes up positions known as enteric sites therefore preventing the pathogenic bacteria from establishing itself and proliferating to become predominant bacteria.

Why take Probiotics?

A viable probiotics supplement acts to maintain and replenish the balance of microflora in the intestinal tract. A regular dose acts as a preventive against intestinal diseases, and aid in the absorption of nutrients. Healthy intestinal tract can boost the immune system, keep diseases of the intestinal tract in check, maintain normal bowel movements, and prevent indigestion and bloating.

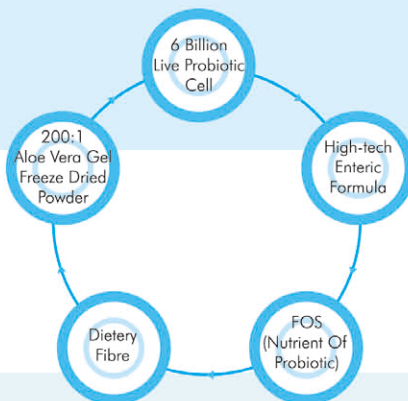

Probiotics are beneficial to people with lactose intolerance, irritable bowel syndrome (IBS), antibiotics treatment, gynaecologic infections, hyperlipidemia, hypertension, coronary artery disease (CHD), diabetes, adiposity, gastropathy, skin allergy and chloasma.

Away from home, probiotic supplements act as a barrier to the strains of unwanted bacteria encountered and prevent the intestinal disruptions often associated with travelling. U.S. bowel expert Bernard Jansen says: "Poor bowel management is at the root of all health problems."

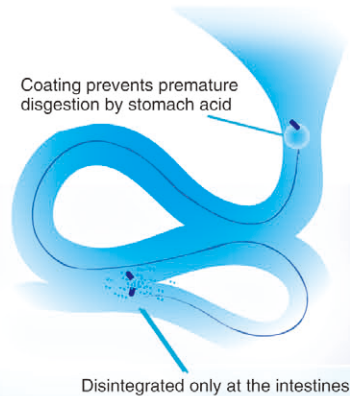

When you need to take Probiotics?

- Facultative or habitual constipation
- Bad breath and body odor
- Prone to flu infection
- Bloating in the abdomen
- Overweight
- Poor quality of sleep
- Bad facial complexion
- Malnutrition
